How do I combine multiple Blackboard sites that are not cross-listed?

If you want to combine or merge two or more Blackboard course sites, submit a request to the ITS Help Desk. (Merging sections of the same course into a single Blackboard site can make student activity easier to manage.)

Provide the Course Reference Number (CRN) for all sections or course sites that you want merged. ITS may request the full course IDs, as well (e.g., 202010_FALL_TLED403_12345).

Cross-listing Separate Courses

Cross-listing two separate courses--undergraduate and graduate versions taught as one class, for example--must be accomplished in Banner. Your department will coordinate cross-listing with the University Registrar's office.

After the courses are cross-listed, you should see a single Blackboard site.
